WEST BUCKLAND PARISH COUNCIL

Business Risk Assessment

This risk assessment is a systematic general examination of financial controls, business risk, working conditions, activities carried out by the clerk, councillors and volunteers and environmental factors that will enable the council to identify any potential risks inherent in its activities and operations. Based on a recorded assessment, the council should then take all necessary steps to eliminate or, where this is not possible reduce the risks, insofar as is reasonably practicable to do so.

This document has been produced to enable the Parish Council to assess the financial, management and other business risks that it faces and to satisfy itself and others that it has taken adequate steps to control them. In conducting this exercise, the following plan was followed:

- Identify the areas to be reviewed
- Identify the risks and determine the likelihood and severity
- Eliminate risks where possible by and implement appropriate risk control strategies to manage the residual risks
- Record all findings, regularly monitor and review as necessary

L = Likelihood S = Severity
